

Description

Automatic translator gives it some on the Internet. But unfortunately they are not always provide the best translation. bugaword.com shows you these little weaknesses in a fun way.

You can make fullest bugaword.com on the limits of automated translation into 42 different languages.

Just enter a phrase and let it translate into any language. The translation will be back translated into your language and then back into the language you have selected. And until there are no differences.

Just try it out or even turning over the funny translations by others.

To show you the limits of automatic translation, the description above is an automated translation of our german page.
